**Step 1.** Prepare connector components and strip coaxial cable according to given dimensions (check point 1)

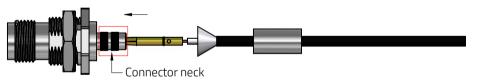

Step 2. Please slide ferrule onto cable and splay out cable braid

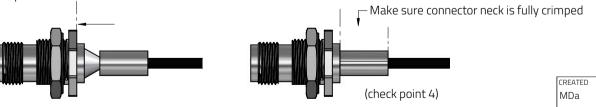

Step 3. Slide center contact up to dielectric and solder cable center conductor using minimum amount of solder paste through solder hole (check point 2-3)

Step 4. Push cable with center contact into connector main body until perceptive point Cover cable braid over connector neck carefully

Step 5. Crimp ferrule with tool hex size: .213"

Crimp Tool PN: 600600 Assembly Method: Center contact: Soldered Crimp Head PN: 60060060101 Outer contact: Crimp

Cable Type: Flexible Cable RG58/RG141/Low Loss 195

## Cable Strip Dimensions (mm):

## Check Point:

- 1. No damaged components; and no split cable after stripping
- 2. Assembly can be performed with or without tinned cable The tinned cable center conductor can enhance the hardness of the cable center conductor and benefit solder process
- 3. No excess solder, melt dielectric, and misaligned center contact after assembling

4. No significant dog ear after crimping
