

MyWE – New features & functionalities | 22.06.2026

New Features

Completely new functionalities are now available on the platform:

- **Position numbers on document level**

Position numbers are now displayed in documents. This makes it easier for you to identify the relevant articles in offers, order confirmations, and delivery documents more quickly.

Position numbers in an order.

- **Calendar weeks in the date picker**

Calendar weeks are now displayed in the date picker component in MyWE. This supports planning and helps streamline the ordering process.

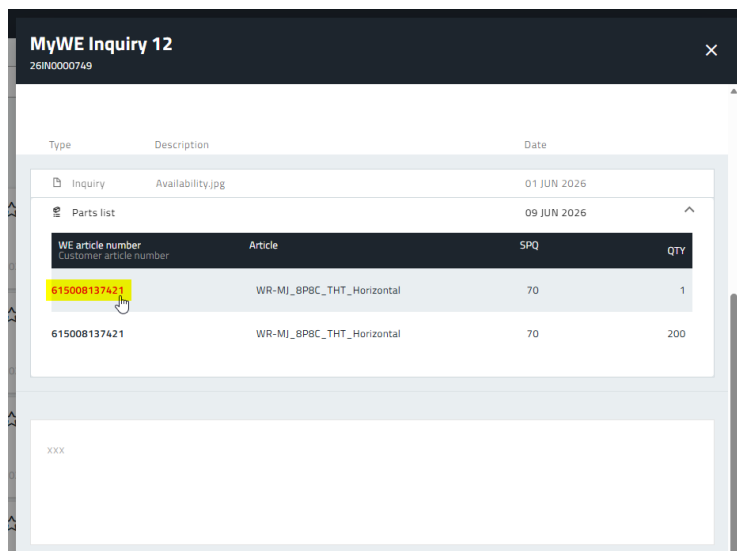

Calendar weeks can now be used as a reference for better planning.

Improvements to Existing Features

Enhancements and optimizations to existing functionalities:

- **Direct links from article number to online catalogue**

By clicking on an article number, users can now jump directly to the corresponding article in the online catalogue to access additional information.

Connection to online catalogue.
