

Logistic solutions

Würth Elektronik CBT Asia Production

Würth Elektronik CBT Asia Production offers individual and flexible delivery solutions: fast by air, cost-effective by sea freight or climate-friendly by rail. We select the optimal shipping method based on the customer's individual requirements and delivery plan. Our customers benefit from our established delivery routes and all-round service. In addition, we ensure complete risk management along the entire supply chain. Speed, reliability and safety are our top priorities.

	Delivery time	Costs	CO ₂ emissions
Sea freight	🕒🕒🕒	\$	🌍🌍
Air freight	🕒	\$\$\$	🌍🌍🌍
Rail freight	🕒🕒	\$\$	🌍

Sea freight

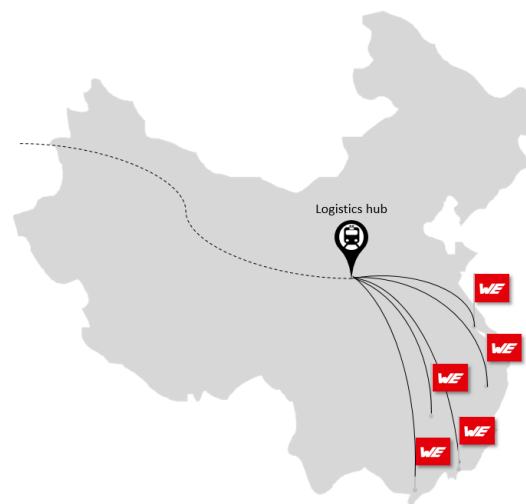

Maritime freight transport is characterised by unbeatably low handling costs and environmentally friendly delivery. For large volumes of goods and goods with no great urgency, we offer sea freight as a transport method in the low-price segment. The transport time by multimodal transport from Asia via the port in Hamburg and the subsequent transport to the customer takes approx. 77 days.

Air freight

Due to the short transport times and fast cargo handling, air freight is suitable for goods with a high degree of urgency. The high safety standards ensure low liability for disruptions and high reliability. Our proven and precisely organised transport routes enable fast and on-time delivery. The delivery time including customs clearance is approx. 10 days. In addition, we offer express delivery from Asia to the customer with a transport time of approx. 3-5 days.

Rail freight

Rail freight is characterised by a high level of safety and reliability. The low CO₂ emissions make this transport one of the most sustainable logistic solutions. Würth Logistics secures the freight capacities as well as the option for full and partial container loading. In terms of delivery times and costs, rail freight transport can be ranked between sea and air freight. The transport time is approx. 35 days.

IATF 16949-compliant warehouse

Goods are received in our ASIA warehouse in Niedernhall, Germany, which has 500 storage spaces. Call-offs within 24 hours are possible (valid for Germany and the neighbouring countries). By storing the goods free of charge, we save our customers storage costs and reduce their risk.
