## Update customer information - COVID-19

Dear customers,

we are still in the middle of a pandemic that is affecting our daily lives. The federal and state governments are working together to contain the Corona pandemic. They have agreed on openings depending on the infection situation - the states are responsible for the concrete implementation. Relief is available for those who have been vaccinated, recovered and tested. We act according to these guidelines for the benefit of our employees.

We very much hope that you as a company and all your employees are not or have not been affected by cases of illness. The health of all people is now more important than ever.

The global economic situation is also very important and we at Würth Elektronik eiSos are doing our best to maintain normal business operations. Furthermore, many of our employees work from their home office; in alternating shifts between home office and the respective locations. In this way we can ensure that we are available for our customers as usual, with maximum security for our employees. Our global warehouses and logistic locations are stable and can ensure the smooth processing of your orders. We have also introduced special safeguards in these departments to ensure that separate shifts are available at all times.

Availability of goods has top priority at Würth Elektronik eiSos. In supply chain management, everyone works together to ensure that the flow of goods from our productions runs smoothly, despite some challenges and partial fluctuations.

Due to the difficult economic situation, an increasing number of insolvencies are expected in the coming months. Due to a very broad product mix and the supply to various industries, Würth Elektronik eiSos is very stable and will therefore be a reliable partner for you in the future.

Currently, no one can say how long we will have to live with the current conditions. To ensure your supply, we therefore recommend that you plan for the long term.

In case of concrete questions, please contact our responsible colleagues in the sales department.

With best regards,

Würth Elektronik eiSos GmbH & Co. KG
